Copilot Agents in SharePoint

- ◆ What is an Agent?
- ◆ M365 Copilot Chat Work
- ◆ Creating an Agent in SharePoint
- ◆ Does Copilot love OneDrive?
- ◆ Creating an Agent in Copilot Studio

What is an Agent?

- AI assistant that connects knowledge and data sources to Microsoft Copilot
- AI-driven agents assist users in performing a variety of tasks
 - offer suggestions
 - automate repetitive tasks
 - provide insights to help you make informed decisions
- Content structure matters! (Copilot isn't magic.)

Agent Maturity Model

2026 MEDIEVAL EDITION

M365 Copilot Chat Work

M365 Copilot Chat Work

- Out of the box, no work for you!
- <https://m365.cloud.microsoft/chat>
 - Or <https://office.com> ☹️
- Good for general stuff
- Good for *finding* SharePoint content
- Not great at *interacting* with SharePoint content
- Can't shut off external knowledge

Drones and SharePoint Information

WorkWeb

Today

Is there any information on drones in sharepoint?

Copilot

You asked whether there's any information on drones in SharePoint. I explored your enterprise data across files, emails, chats, and transcripts, and here's what I found from a total of 10 relevant results.

Drones in Enterprise Contexts

The most directly relevant document is the [Eagle Air](#) file, co-authored by you and Garry Trinder. It outlines a high-performance drone designed for enterprise use, detailing its specifications, flight capabilities, and potential applications in large-scale operations. While it doesn't explicitly mention SharePoint, the document is clearly positioned for enterprise integration, which could include data workflows or storage in SharePoint environments ¹.

Another file, [Equity EUEAFF 0076](#), discusses broader automation trends including drones in logistics and military contexts. It notes that 40% of U.S. Air Force pilots are now drone operators and speculates on the future of pilotless airfreight. Again, while not SharePoint-specific, it reflects the growing relevance of drones in enterprise strategy ² ³.

Drones in Conversation

In a Teams chat with Shane Young, you mentioned concerns about a "Tesla drone" during a vehicle trade-in. While this use of "drone" appears metaphorical—referring to dealership staff—it does reflect your awareness of automation and procedural rigidity, which could be relevant in SharePoint governance or automation discussions ⁴.

Draft a SharePoint integration plan for drone data

Summarize the Eagle Air document

Is there any information about drones in SharePoint?

Copilot

I found several relevant items in your enterprise data (130 file matches overall) related to drones, including content that appears to be stored in SharePoint or authored by you. Here's what's actually there vs. what's not.

What does exist (drone-related content)

1. Drone product documentation (likely in SharePoint document libraries)

- Contoso Quad – a detailed enterprise drone spec + FAQ document
- Mark8 controller – a drone controller manual/spec sheet

From what's explicitly in those files:

- They describe commercial/enterprise drones (flight specs, battery, payload, range, etc.)
- Include support-style FAQs and technical details for usage scenarios like aerial data capture
- The controller doc focuses on control hardware capabilities (transmission distance, controls, compatibility)

Notably, both files list you (Todd Klindt) as an author or co-author, so you've directly been involved in this content.

What I did not find

- No evidence that "drones" are a SharePoint feature or concept discussed in meetings, emails, or chats
- No internal discussions tying drones to SharePoint architecture, solutions, or projects
- No SharePoint-specific solution (e.g., "drone management system in SharePoint") mentioned

The only other appearance of the word "drones" was:

- A casual phrase in an email (non-technical, not relevant to SharePoint)

What this likely means

Based strictly on your enterprise data:

- Drone content exists as documents stored in SharePoint (or similar storage)
- But it's just content hosted in SharePoint, not something native to SharePoint itself

If you were expecting something else

There are a couple possibilities (not from the data, just interpretation):

- You might be thinking about:
 - Using SharePoint to store/manage drone data (images, telemetry, etc.)
 - A project/code name involving "drones"
 - Or an AI/automation analogy (sometimes people use "drone" metaphorically)

Quick takeaway

- Yes: there is drone-related information in your SharePoint ecosystem (files)
- No: there's no indication of drones being a SharePoint capability or solution

If you want, I can dig deeper—like where those files live (sites/libraries) or whether there are related projects, lists, or Teams conversations around them.

Agents in SharePoint

What is a SharePoint Agent?

- A Copilot experience scoped to specific SharePoint content
- Focused on selected files, libraries, lists, or sites
- Gives users a curated AI experience
- Lets users interact with content instead of hunting for it
- Requires a Copilot license or PayGo set up in your tenant

Welcome messaging

Help users understand how to best use this agent

Hi, I'm Helen in HR. You can ask me anything about our HR and I'll help you find your answer.

Starter prompts

Help users by providing questions or requests that showcase how this agent can help.

What is the PTO policy?

Can I bring my pot belly pig to work?

Where can I find a list of the company holidays?

Agent instructions

Define the agent's role, tone, and limitations. Be specific about what responses you'd like and give examples if needed.

Your name is Helen. Provide accurate information about the question asked based on the documents provided. Use a friendly, helpful tone when responding.

It's ready!

The screenshot displays a SharePoint interface for a site named "Copilot Test Team Site". The left sidebar contains navigation options: Home, Conversations, Documents (selected), Notebook, Pages, Statements of Work, Products, Design Ideas, Employees, Social Media Topics, Legal Contracts, Invalid Contracts, Contracts, Site contents, Recycle bin, and Edit. The main content area is titled "Documents" and shows a list of files. Above the list are buttons for "AI actions", "Add shortcut to OneDrive", "Forms", and "Classify and extract". The document list includes columns for Name, Modified, and Modified By.

How to create an agent

- Where to start -> Where is the file?
 - Site Home Page -> .agent file is in the site assets library, not in the approved folder
 - Suite bar/Copilot chat pane -> .agent file is in the site assets library of the site
 - Library Command Bar -> .agent file in this library
 - File context menu -> .agent file in the same library
- Scoped by default to location agent was created in
- Up to 20 sources (library or folder)
- Hub will target all sites in hub

Approved Agent

- Any member can make and use an agent
- Only site owners can approve an agent
- Approving an agent makes it available everywhere in the site
- Approving an agent allows it to be set as the default agent for the site

Provisioning Agents

- It's just a file
- Filename is Agent name
- It's not encoded, just JSON

Things to think about

- Renaming the file, renames the agent – Always need to be named reasonably
- Agents are recommended across site collections assuming user has access to the file, and the resources in the agent's scope.
- Agents give your users an additional way to look at the same [sub]set of content. You're not removing any capabilities they are used to.

Can I bring my cat to work?

4 minutes ago

Yes, you are allowed to bring your cat to work. Here are some guidelines to follow:

- **Behavior and Well-being:** Ensure your cat is well-trained, friendly, and comfortable around other people and animals. Monitor your cat and intervene if they cause any disturbance, damage, or inconvenience to anyone [1](#) [2](#).
- **Cleaning Up:** Promptly and properly dispose of any messes or accidents your cat makes. Have supplies on hand, such as paper towels, wipes, bags, or disinfectants [1](#) [2](#).
- **Health:** Your cat should be up-to-date on vaccinations, in good health, and protected from fleas and ticks. Keep a copy of your cat's medical records and contact information for your veterinarian in case of emergencies [1](#) [2](#).

Design Ideas ☆

	Title	User	Teams Content	Teams Date ⓘ	Approval Status	Approver Com...	+ Add
	Improved Flash Performance	Johanna Lorenz	I've been researching new LEDs from Fabrikam. We can increase luminosity and color spectrum while increasing battery life. Win/win!	May 13	Yes	Great idea, Johanna. People will love this!	
	Waterproof Model	Irvin Sayers	We should make a waterproof model for the active/outdoorsy types.	May 13	No	This is a good idea, Irvin. We will explore feasibility and viability before approving.	
	Vibrant Body Colors	Grady Archie	We may appeal more to a wider user demographic if we add a line with vibrant body colors.	May 13	Yes	Great thinking, Grady. Can you produce some product mock-ups illustrating your ideas?	
	Add some AI	Alex Winters	Let's add some AI to this baby!	May 20	No		
	Needs more cowbell!	Adele Vance	This thing needs more cowbell to really rock!	May 20	No

Agent Scenerios

Agent scenarios

• Policies

Project management

- **Summarizing progress reports from team members:** Copilot agents can compile and summarize updates from different team members, providing a comprehensive overview of the project's status.
- **Identifying key milestones and potential roadblocks:** These agents can highlight critical milestones, identify potential issues before they escalate, and suggest corrective actions.
- **Drafting meeting agendas:** Based on project priorities and ongoing tasks, Copilot agents can draft detailed agendas to ensure meetings are focused and productive.

Customer support

- **Searching through the company's knowledge base:** Copilot agents can quickly sift through vast amounts of information to find relevant solutions and previous support tickets.
- **Drafting responses to customer queries:** They can help craft clear and comprehensive responses, incorporating troubleshooting steps and additional resources to resolve issues efficiently.

Research and development

- **Gathering and summarizing research:** Copilot agents can scan the latest research papers, patents, and industry trends, presenting the information in a concise and understandable format.
- **Creating comparative reports:** These agents can create reports that outline the pros and cons of different materials or approaches, aiding in the decision-making process.

Sales and marketing

- **Analyzing client data:** By examining a client's business, competitors, and industry, Copilot agents can deliver insightful analyses that inform sales strategies.
- **Crafting personalized presentations:** Copilot agents can help you develop customized presentations that address a client's specific needs and highlight the benefits of the company's products or services.

Human resources

- **Updating employee handbooks:** Copilot agents can assist in rewriting sections of the employee handbook, ensuring clarity and compliance with regulations.
- **Suggesting additions based on new policies:** They can identify gaps and suggest additions to the handbook based on recent company policies and legal requirements.
